The experiences show that there is an interest to this kind of music style both in the younger and in the bigger age-group too. But the biggest part of the audience - of course - are from the younger age-group. The atmosphere of the concerts characterizes a real rock music concerts with a lot of furious, nevertheless those who like the softly songs can find their own world throw the lyrical songs.

The musical demand can separate to 2 parts:

✓	own songs (of course)
✓	musical settings of other groups's songs

The group has made only own songs since 2005. The first own album was came at June 2005. The name of the album is "JÓAPÁNK: HOZZÁD SZÓLOK" ("JÓAPÁNK: I CALL YOU). This album published just in lower quantity and it had got problems with the quality too. So, there are 5 old songs and 5 new songs on the first studio album which published in 2007. And this is the reason why it called „Újra szólnak a dalok” („The songs are sound again”). In 2009, the group went to studio again to record the 3rd album, which contains another one song from the first album („Emlék örökké él” / „Memory lives forever”). Although the 3rd album was not released because of financial problems, the album „Minek is beszélek...?!” („Why Am I talking...?!”) can be listened at the homepage www.szekcio.hu. And the songs of 4th album have already on the way...

The lyrics are deal with deep feelings, with thoughts, with world concepts that come across by the song of rock music for the audience.
